Enclosed shoes
Sunscreen

Route details

Schedule: From 7 am to 9 am, you chose the hour that fixes better to your preferences.

Distance and Time on the bike (round trip): 341 kilometers, 448 minutes

Total time activity: 10.1 hours

Itinerary: You will enjoy the breeze, the sun or the rain, the adrenaline and the power that gives a high capacity motorcycle. I'll pick you up in the hotel on my high capacity motorcycle, I'll give you a souvenir, safety elements, and instructions. Then we'll ride about 140 kilometers crossing the Valle del Cauca, after 2 hours we arrive at the white city, historical and architectural heritage, you will walk through its peculiar streets and you will know its most emblematic buildings such as the cathedral, the clock square, the Quimbaya town and you will enjoy a lunch with the typical food of the region. Then we'll ride about 1 hour (34 kilometers) climbing the Andes mountain to arrive at the thermal waters that are generated thanks to the volcanic soil of the region. We will enjoy lunch in a restaurant and take time to enjoy a variety of thermal pools. Then we'll ride again the bike to come back to the hotel, enjoying again the curves, the breeze and the nice weather of the Valle del Cauca.

About the place: Popayan is known for its whitewashed buildings from the colonial times and as a religious center with popular processions of Holy Week. Among the numerous churches of the city are the basilica cathedral of "Nuestra Señora de la Asunción", neoclassical style and with a dome, and the church of "La Ermita", dated from the seventeenth century. In the center, among the shadows offered by the trees of Caldas Park, is a 17th-century clock tower. Coconuco is a region well known in Colombia for its thermal pools and streams. Going to Coconuco is the perfect trip to have a relaxing day and enjoy the surrounding nature. In volcanic zones, water can be heated when it meets magma (molten rock).

About the expertise: We are just a Colombian bikers team, we've been touring the world on high-capacity bikes in Norway, Switzerland, Finland, UK, Spain, France, Italy & our beautiful country: Colombia. We love that freedom feeling that bikes give, feeling the breeze & creating bonds of friendship with people who share this same passion. We've had the opportunity to show bikers from around the world the hidden corners of Colombia & now we want to share a little of our culture with people who haven't been able to meet them because they aren't related. I invite you to be a "biker" & built lifetime memories
