## **Route details**

**Schedule:** From 7 am to 4 pm, you chose the hour that fixes better to your preferences. We suggest don't try to be in destine between 11:30 am and 1 pm due to the high exposure to solar radiation could be harmful.

**Distance and Time on the bike (round trip):** 29 kilometers, 65 minutes

**Total time activity:** 3 hours

**Itinerary:** You will enjoy the breeze, the sun or the rain, the adrenaline and the power that gives a high capacity motorcycle. I'll pick you up in the hotel on my high capacity motorcycle, I'll give you a souvenir, safety elements, and instructions. Then we'll ride about 8,5 kilometers climbing the Andes Mountain to arrive at the Cristo Rey monument, the bigger and representative monument in Cali. We'll be here for about 30 minutes to have an exclusive point of view of the city, share a hydrating drink, some knowledge about the city & the culture in the region, practice your Spanish. Then we'll ride more into the Andean mountain to arrive at Lady of the Andes, better known as the "Virgen de Yanaconas". This beautiful virgin was built on the initiative of the Marist Brothers on the commemoration of the Marian year. We'll be here for about 30 minutes to have an exclusive point of view of the landscape and continue sharing. Then we'll ride again the bike for 13 kilometers to come back to the hotel, enjoying again the curves, the breeze and the nice weather of the "Valle del Cauca".

**About the places:** Cristo Rey is a viewpoint of the city with a monument made of iron and concrete, its mass is approx. 646 tons & 26 meters height and is to 1440 meters over the sea level.

Yanaconas is a viewpoint of the Andean landscape with a monument made of iron and concrete. For the building was necessary 44.350 bricks and 1.033 concrete bags climbing up by mule.

Both places are located outside the city and the way is plenty of curves and nature. You can have different options to arrive, but if you want a total personalized driver and guide and if you enjoy the freedom better than the traffic job on a car, this is your best chance.

**About the expertise:** We are just a Colombian bikers team, we've been touring the world on high-capacity bikes in Norway, Switzerland, Finland, UK, Spain, France, Italy & our beautiful country: Colombia. We love that freedom feeling that bikes give, feeling the breeze & creating bonds of friendship with people who share this same passion. We've had the opportunity to show bikers from around the world the hidden corners of Colombia & now we want to share a little of our culture with people who haven't been able to meet them because they aren't related. I invite you to be a "biker" & built lifetime memories.
